- Atakent High School

SERTIFICATE

- BTK Academy -Web Development with HTML5
- IoT and Microprocessor 101 Certificate Program

LANGUAGES

- English (B1-B2)
- German(A2)

PROFILE

I am an associate degree student studying web design and software. I have a structure that takes responsibility in teamwork, has strong communication skills and is open to learning.

CAREER GOAL

I want to improve myself in the sector by gaining experience in software development. I aim to direct my career with solid steps by taking part in an internship position where I can apply the knowledge I have gained in real projects. As someone who is compatible with teamwork and open to learning, I want to observe and contribute to sectoral dynamics in the field.

PROJECTS

Dietitian Automation System (C# & MS Access)

A desktop application developed using C# Windows Forms. It allows dietitians to manage patient records, body analysis data, and personalized nutrition plans. Microsoft Access is used as the database.

Depo360 Inventory Tracking System (PHP & phpMyAdmin)

A web-based system designed for small businesses to easily manage product and inventory tracking. Built with PHP and connected to a MySQL database via phpMyAdmin. Supports different user types such as pharmacies and tech stores.

FitPulse Website Design (Figma)

A user-centered web interface prototype designed in Figma. The project focuses on offering personalized fitness programs based on user goals and age, with a clean and responsive layout.
